SUMMARY

AI/ML Engineering undergraduate specializing in deep learning and LLM-based systems. Experienced in building end-to-end ML pipelines, deploying models using Docker and FastAPI, and optimizing models for performance. Strong foundation in Data Structures and scalable system design.

EDUCATION

Panimalar Engineering College – Chennai **SEP 2024 - Present**
B.TECH ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING
Relevant Coursework:
Machine Learning, Deep Learning, Data Structures & Algorithms, Database Management Systems, Probability & Statistics, Linear Algebra, Artificial Intelligence

SEVENTH DAY ADVENTIST MATRICULATION HIGHER SECONDARY SCHOOL – MADURAI **MAY 2024**

HIGHER SECONDARY EDUCATION (COMPUTER SCIENCE)

SKILLS

PROGRAMMING: PYTHON, SQL

CORE AI / ML: SUPERVISED LEARNING, MODEL EVALUATION, SCIKIT-LEARN

DEEP LEARNING: PYTORCH, NEURAL NETWORKS, CNN

GENERATIVE AI: TRANSFORMERS, HUGGING FACE, LANGCHAIN (BASICS)

DEPLOYMENT BASICS: FASTAPI, DOCKER, GIT

WORK EXPERIENCE

AI/ML Intern – TANSAM (TIDCO & Siemens) **April 2025**

Completed a one-month internship in Artificial Intelligence and Machine Learning through TANSAM. During this internship, I learned how AI/ML concepts are applied in real-world Industry 4.0 environments. I worked on basic machine learning workflows, explored practical AI techniques, and gained exposure to productivity, efficiency, and automation concepts used in industries.

PROJECT EXPERIENCE

Project Name:
Tulasi AI – "AI-Based Learning Assistant " **(Ongoing) 2026**
- Building an AI-powered educational assistant using LLM-based architecture
- Implementing RAG pipeline for contextual question answering
- Integrating PDF upload and document-based query resolution
- Developing backend APIs using Python and FastAPI
- Designing modular architecture for scalable deployment

NASA SAC Hackathon – "A World Away: Hunting for Exoplanets with AI" **JAN 2026**
- Developed an AI/ML approach to analyze astronomical datasets for exoplanet detection
- Applied data preprocessing and pattern recognition techniques
- Collaborated in a team to design a predictive model for signal classification

Handloom Hackathon – AI-Driven Digital Storytelling Platform **AUG 2025**
- Designed an AI-based platform to support digital branding for handloom weavers
- Built concept for storytelling-based product traceability system

Integrated AI features for marketplace optimization and user engagement

CERTIFICATIONS & ACHIEVEMENTS

Handloom Hackathon 2025 – Grand Finale Finalist **AUG 2025**
Organized by Ministry of Textiles in association with Indian Institute of Technology Delhi
Generative AI Program – Tata **DEC 2025**
Completed advanced program covering LLMs, prompt engineering, and AI automation
Advanced Software Engineering Simulation – Forage **DEC 2025**
Hands-on exposure to data structures, software architecture, and database design.
NASA International Space Apps Challenge 2025 – Participant
Worked on "**A World Away: Hunting for Exoplanets with AI**" challenge applied AI/ML techniques to analyze astronomical datasets for exoplanet detection **JAN 2026**
Data Analysis Job Simulation – Deloitte **DEC 2025**
Practical experience in data cleaning, visualization, and analytical problem solving.
